The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Page in view of Lower et al. (Lower). Page's base 16 and core 20 meet the limitations of claims 1-3, 5 and 6 with the exception of the use of bakelite. However, as disclosed by Lower metal or plastics such as bakelite may be used to form the base portion of such devices. It would have been obvious to one of ordinary skill in the art to have used a plastic such as that disclosed by Lower if it was desired to cut down on manufacturing costs.

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Marsh, Guthrie et al., Watson, Wodarczyk, Merola, Bechle, Pappas, Darmis, and Foy have been cited for interest because they disclose similar tip structures.
